

NEWS RELEASE

SENSORTRAN BECOMES WHOLLY OWNED SUBSIDIARY OF HALLIBURTON

Austin, Texas – April 21, 2011 – SensorTran, producer of the world’s most advanced Distributed Temperature Sensing (DTS) systems, announced today that it has entered into an Agreement with Halliburton Energy Services Inc (“Halliburton”) whereby SensorTran becomes a wholly-owned subsidiary of Halliburton.

Under Halliburton’s direction, SensorTran will continue to sell, support and maintain its extensive portfolio of Distributed Temperature Sensing (DTS) products and services to customers in all markets currently served by SensorTran.

Halliburton is already creating innovative fiber optic solutions for its Oil & Gas customers and will continue to develop DTS solutions for the Power, Process and Pipeline markets to create greater value to its customers in all market segments. SensorTran’s DTS interrogation systems will become the platform for many of these new technologies.

In addition, SensorTran will become a key element in the new Halliburton Fiber Optic Center of Excellence, located in a new dedicated facility opened in Houston on May 1, 2011. The Fiber Optic Center Of Excellence will encompass not only R&D but also sensor production, project management and field deployment and maintenance of fiber optic sensing solutions across all markets.

About SensorTran Inc.

SensorTran is today a global supplier of fiber optic-based Distributed Temperature Sensing (DTS) systems. Customers benefiting from SensorTran’s technology include many of the world’s largest energy providers. DTS systems have applications in downhole oil & gas, transmission and distribution power cable monitoring, pipeline flow assurance and leak monitoring, storage tank leak detection and environmental and geothermal monitoring.
