

SensorTran Moves into New Facility

US headquarters expands to occupy 10,000 sq. ft space.

Austin, TX - December 19, 2006

SensorTran, Inc., manufacturer of the world's most advanced distributed temperature sensing (DTS) systems, has completed the final phase of its separation from former parent company, Systems & Processes Engineering Corporation (SPEC), by relocating to their own facility. SensorTran's new building is in SE Austin, TX, approximately 6 miles from their previous downtown location. The larger facility features expanded manufacturing, lab, and office space and is home to SensorTran's 23 US-based employees. Four additional employees operate out of the main sales office in Southampton, UK.

SensorTran, Inc. is a global supplier of fiber-optic based distributed monitoring solutions. Customers benefiting from SensorTran's DTS technology include some of the world's largest energy providers. DTS systems have applications in downhole oil & gas, power cable monitoring, pipeline monitoring, concrete cure, vessel and tank leak detection, and fire detection.
