### **SENSORTRAN TAPS INDUSTRY EXPERT JACK ANGEL TO HEAD OIL & GAS BUSINESS DEVELOPMENT**

**Austin, Texas – April 30, 2008** – SensorTran, developer of the world's most advanced distributed temperature sensing (DTS) solutions, today announced that J.F. (Jack) Angel has joined the company as Vice President of Business Development for the Oil & Gas market, focused specifically on pipeline, well, and reservoir monitoring.

Mr. Angel is a recognized expert in the oil and gas service business, bringing to the table proven performance in the application of emerging technologies. Most recently, he served as Vice President of Sales & Marketing at Sabeus, Inc. in Houston, Texas, where he had full operational and financial responsibility for all product lines. Prior to Sabeus, Mr. Angel spent 25 years at various Baker Hughes companies, including Baker Hughes Pipeline Management Group, QuantX Wellbore Instrumentation, Baker Oil Tools, Baker Hughes Inteq, and Baker Hughes, Inc.

“Jack Angel is highly-regarded in the oil and gas industry. Having him on the SensorTran team will add to our deep understanding of customer requirements, implementation strategies, and other critical details related to managing and monitoring energy assets,” said Kent Kalar, SensorTran CEO and President.

“It is my pleasure to join the technology leader in distributed sensing systems,” said Angel. “Recent high profile cases continue to demonstrate SensorTran’s ability to help customers get the most out of their assets in an economical and reliable manner. These projects are a testament to the value the company helps create in the energy industry. SensorTran has made some revolutionary technical strides over the past year, and they clearly hold customer satisfaction as a core value.”

Jack will be based in Houston, TX, USA, and can be contacted at [angel@sensortran.com](mailto:angel@sensortran.com).

### **About SensorTran Inc.**

SensorTran is a global supplier of fiber optic-based distributed monitoring solutions. Customers benefiting

from SensorTran's DTS technology include the world's largest energy providers. DTS systems, which can be customized for any language, have applications in downhole oil & gas, transmission and distribution power cable monitoring, pipeline flow assurance and leak monitoring, process vessel hot spot detection, storage tank leak detection and environmental monitoring.
